

LEARNING MANAGEMENT SYSTEM

What is 'ELMS'

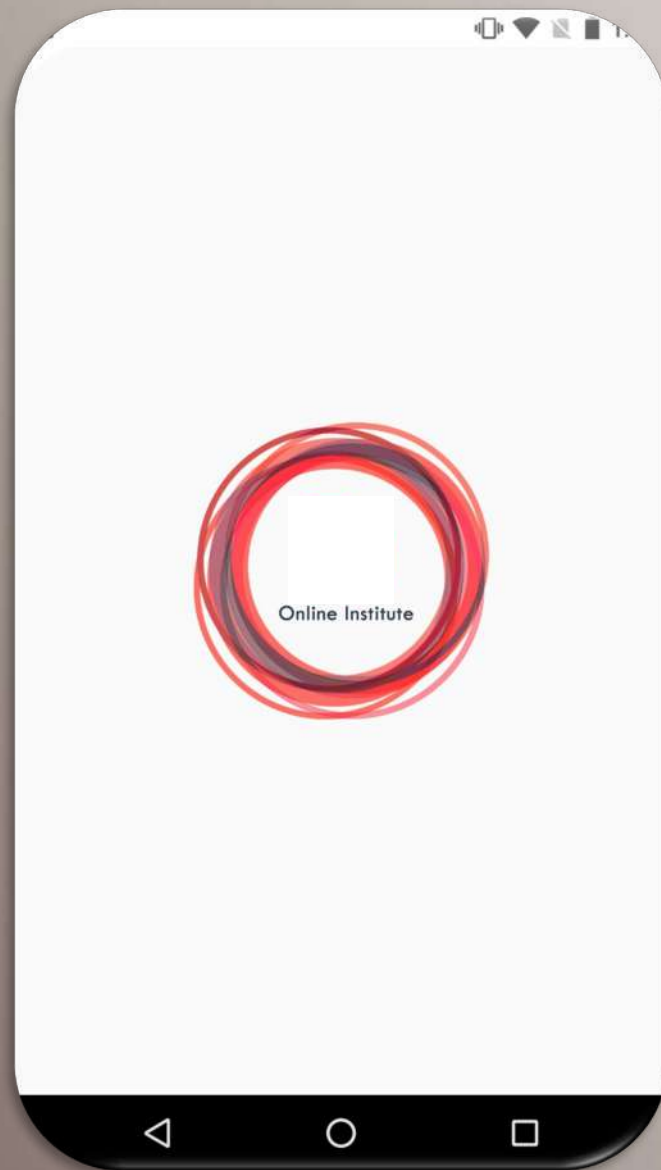

- ELMS is a marketplace for online learning.
- Here students and teachers are combined together for sharing knowledge through a structured course-based system.
- Teachers or instructors can create an unlimited number of courses, video lessons and documents according to their expertise and students can enroll in these courses and make themselves skilled anytime and from anywhere.

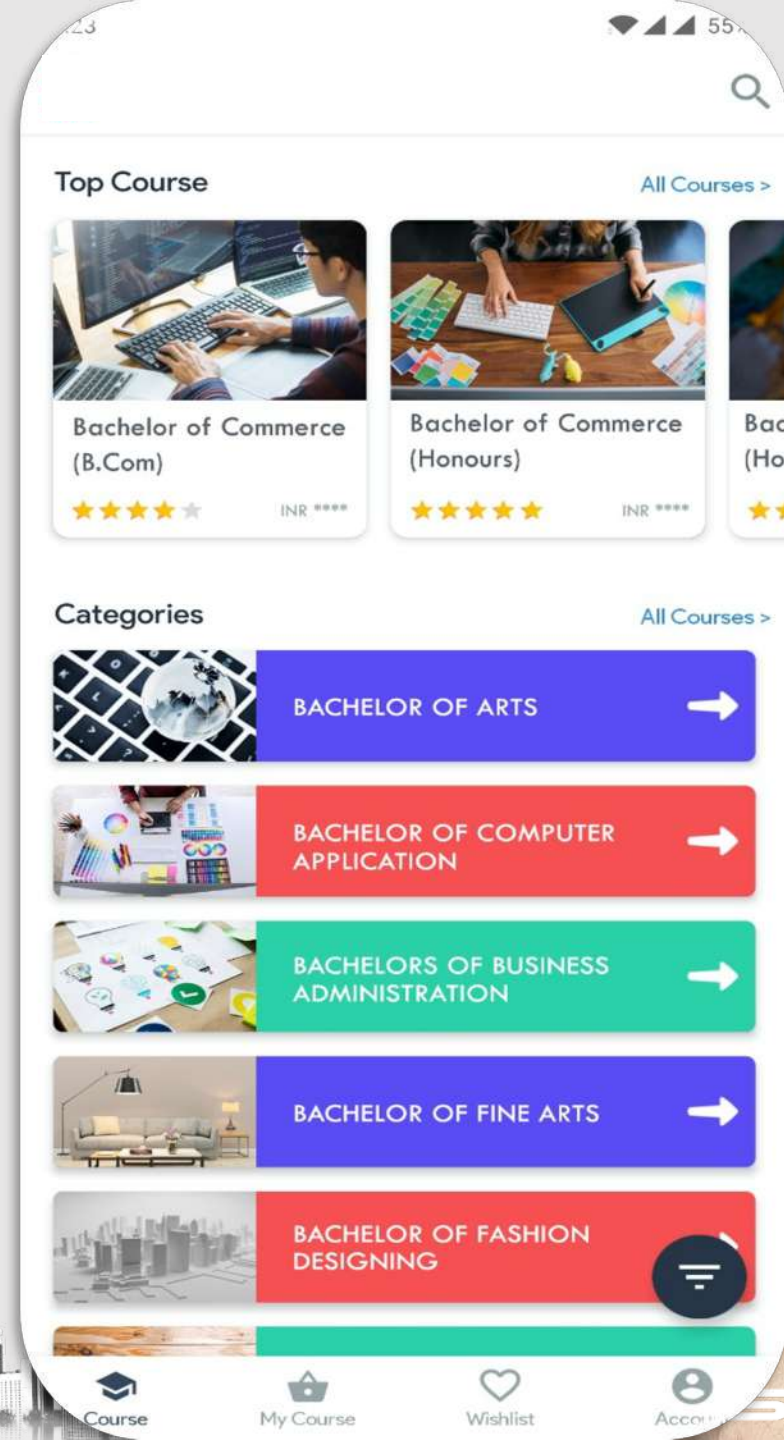

How It works

- LMS collaborates 2 user types primarily
- Admin and students, if you are the sole instructor of your course portal
- If you allow public instructors, then it becomes 3
